

Matrix Operations

This menu allows to do the following matrix manipulation routines:

- Transpose of a matrix,
- Matrix multiplication,
- Finding the inverse of a matrix,
- Matrix determinant calculation.

How To

TRANSPOSE MATRIX, FIND THE INVERSE OF A MATRIX OR CALCULATE MATRIX DETERMINANT:

- ✓ Run a corresponding command from the **DATA->[MATRIX OPERATIONS]** menu.
- ✓ Select a range with matrix.

MULTIPLY TWO MATRICES:

- ✓ Run: **DATA->[MATRIX OPERATIONS] MATRIX MULTIPLICATION** command.
- ✓ Select two ranges.

Note

Please check if the "Labels in first row" option has the correct value. If a range with matrix has no labels - turn this option off.
